Entrepreneurial Innovation and Leadership

Preparing for a Digital Future

- Goes beyond simply outlining 'critical success factors' of startups and discusses the network of factors that influence successful organisations
- Investigates the role of entrepreneurship for a national innovation system
- Takes a comparative approach between Germany and USA

Taking the themes of entrepreneurship, start-ups, innovation and collaboration, this book seeks to answer the urgent question of how countries and companies can stay competitive in an ever-changing digital environment. The authors determine which entrepreneurial processes will work for whom and under what circumstances, presenting methodological implications for business research, start-ups and policy making. Examining the success of Germany as an innovation powerhouse, and comparing this with the USA, this edited collection provides valuable ideas for improving practice, facilitating start-up activity, and ultimately ensuring a country's competitive edge.
